

One-Day IOP meeting
Complexity and Nonlinear Phenomena in Biological Systems
20 May 2010, University of Bath

Preliminary programme

10:00	registration, welcome and coffee
10:30-11:20	Raymond Goldstein (DAMTP) Synchronization of Eukaryotic Flagella
11:20-11:40	Mike Swift (Nottingham) TBA
11:40-12:00	Ton Coolen (KCL) Generating functional analysis of complex formation and dissociation in large protein interaction networks
12:00-12:20	Alexander Gorban (Leicester) Asymptotic analysis of microRNA action on the protein translation process
12:20-13:30	LUNCH
13:30-13:50	Sandra Chapman (Warwick) A Fundamental Basis for Macroecological Patterns
13:50-14:10	Robert Endres (Imperial) How one cell eats another: experiments and modelling elucidate early signalling events and biophysical requirements for uptake
14:10-14:30	Rainer Klages (QMUL) Anomalous dynamics of cell migration
14:30-14:50	Christel Kamp (PEI) Co-evolution of epidemic spread and transmission network topology
14:50-15:10	COFFEE BREAK
15:10-15:30	Matthew Turner (Warwick) Fibre-like protein aggregates in disease and their interaction with cell membranes
15:30-15:50	Mario Nicodemi (Warwick) A symmetry breaking model for X chromosome inactivation
15:50-16:10	Joanna Bryson (Bath) Determinants of the size of social species' culture
16:10-16:30	Paddy Royall (Bristol) Colloidal dispersions: complexity from simplicity
16:30	close

The meeting is organized by the Nonlinear and Complex Physics Group of the Institute of Physics.
